

Brief Guidelines for Writing a Research Proposal (max 1000 words)

A Research Proposal is an **outline** of a proposed research project.

It is important to note that this research proposal is **NOT your final research topic** and is open to partial or major changes during the programme. The objective of this submission is to only assess the research inclination of the applicant

The Research Proposal may include:

- Title/Topic of the proposed research project
- Broad area of proposed research
- Research Objectives (maybe 2 or 3)
- Explain the earlier work/s that you are aware about in the proposed area/topic.
- Highlight the relevance and significance of the research
- Explain how you propose to carry out the research or research methodology you propose to follow.
